

1. Remove percussion cylinder from the revolver.
2. Take a pair of calipers and measure the overall length first. Measurement should be between 2.155-2.156.
3. Measure the body length. Measurement should be between 1.996 to 1.997.
4. Add the cylinder to cart. A pop up window will ask how for the measurements.
5. Please add and we will modify prior to shipping. Please note, we will need 1-2 business after order is received to modify.
6. If unable to measure please, pack your percussion cylinder and ship to Howell Arms with a note providing your contact information. We will call you once we measure the percussion cylinder and will take your order over the phone.
7. Please note, all modified cylinders are FINAL sales and will not be refunded.
